In Defense of Guntenberg - A Reverie

(A Message from the President)

I recently attended my local consortium meeting where the formal education program was a very enlightening presentation on MLA’s Standards for Hospital Libraries. But, being a fairly informal group that day, the discussion eventually morphed into a lively round-table on some of our more pressing professional issues, including the somewhat difficult (given the budget constraints so many of us face) issue of collection development in this age of electronic vs. print.

This was a particularly timely topic for me as I am currently grappling with a situation recently thrust upon me as the result of institutional downsizing: the transitioning of two separate but connected hospital libraries into one, centralized, system-wide library.

My most pressing issue, right now, is how to provide access to information in the most efficient and effective manner as possible to as many people as possible across the system. The answer is obvious – electronically. And this is what I will do, as much as possible, given the budget that I have. Of course! But, because of budget, it will probably mean that my collection will continue to be a hybrid of electronic and print materials. That is simply the reality I am living with these days.

The benefits of technology are numerous and obvious. I often wonder (and some of you will relate to this, I’m sure) how I ever did my job before the advent of PubMed, EbscoHost, StatREF, and the World Wide Web. Before Docline and email, I can remember telling patrons that their journal articles would be available in a few days to a week. Unimaginable and unacceptable, today. And, my nursing students now carry at least half-a-dozen essential texts with them into clinical practice in the pockets of their lab coats, courtesy of their PDA’s. So, of course I fully appreciate and embrace the power of technology.

But, what of print? I’m not sorry to say that I still have an attachment to the print format, to books, especially. Not so much professionally, anymore, but personally. So, the question for me is, can I still be a “printophile” in this age of technology and not feel guilty? Must it be a matter of either/or (a la Cushing Academy)? And so, with apologies to Plato, I present here my own (albeit brief) Apologia (read Defense). And please remember, this is just a little reverie that I’m hoping you’ll enjoy.

Reading is experiential. I love the sensation of reading. There is just something about the totality of reading a book. It is holistic, involving all five senses in one way or another:

- **Touch**: A book is a tactile thing. Part of the experience of reading, for me, is how the book feels in my hands. Is it hardcover or soft cover, heavy or light? Are the pages fine to the touch or rough and porous (think book club edition)?

- **Smell**: I love the smell of a new book. It’s one of the first things I notice about it. A delightful mingling of fresh ink and new paper smells. I just hold a book up to my nose and breathe deeply. Weird, huh?
● **Sight:** A book is so very visual – from the colors and images of the cover to the quality, size, and type of the print. And, what a bonus if there are photographs and pictures included. A bookcase full of books of all shapes and sizes.

● **Hearing:** I can hear the author’s voice through his/her words – a character’s speech intonation or accent, the background sounds of a particular setting, the voices engaged in dialogue. And, how many of us fondly remember being read to as children or the fun of reading aloud to our own children or grandchildren (oftentimes the same book night after night).

● **Taste:** This is a tougher one, I admit. I certainly don’t recommend chewing on a book (except figuratively, perhaps). But, picture yourself on a gray, stormy New England day, wind blowing, rain or snow beating against the window, and you tucked cozily into your favorite chair or sofa, wrapped in a warm blanket – a steaming mug of hot chocolate beside you. And, maybe some cookies?

So, having said all this let me finish by saying that I embrace technology. Of course I do. We all should and do. But, maybe, just maybe, there’s still a little room left, when all is said and done, for paper and print too? Maybe, just maybe, it doesn’t have to be so much a matter of either/or, but rather the best of both.

**Upcoming MLA Webcast**

**Cut the Cord: Connecting to Our Mobile Users**

**November 18**

Register now for the upcoming November 18 MLA webcast, *Cut the Cord: Connecting to Our Mobile Users*. We all probably have more mobile users than we know about—just think of the immense popularity of the iPhone and other phones with similar capabilities. This webcast will explain new ways for us to help our mobile users, discuss new mobile apps, and explore how we might fund mobile device projects.

The MAHSLIN Education Committee will host the webcast in the Enders Seminar Conference Room at Children’s Hospital in Boston from 1:30 to 5pm. We include a wraparound panel discussion with Scott Kehoe, a consultant and trainer for NMRLS. If your questions have not been answered by the webcast, Steve will address them.

By attending the entire program at Children’s you will earn 3.5 CE credits, but only 2 credits for just the webcast.

Register for the Children’s Hospital MLA webcast and wraparound by emailing Deb Almquist at dalmquist@partners.org.

Although the program costs $25 for nonmembers it is free to all MAHSLIN members.

The webcast will also be shown at UMass Medical School without the wraparound panel discussion. Please contact Penny Glassman (penny.glassman@massmed.edu) for more information.

**Oh, PubMed! Where have you gone, our old friend?**

As we all know by now, the PubMed Redesign went live last month. Everyone has been getting used to the changes, but there have been some common questions relating to the location of some of the features. Here are a few basic tips:

● **Limits:** The choices for limits, history and index of fields are all found on the Advanced Search page. The link to the advanced search page can be found just above the search box.

● **Printing:** Printing in the redesign is done from your browser’s settings. You can use the display settings to change the format to text by selecting the (text) choice for either Abstract or Summary. The MEDLINE, XML and PMID options are text format.

● **Clipboard:** After choosing Clipboard from the Send to menu, an icon will display at the top right hand of the page. You will also be able to find your clipboard items in your history. It is assigned the number 0 with the text in green.

● **Help:** There are several ways to get information on searching PubMed. On the homepage there is a list under *Using PubMed* or a **HELP** link found just above the search box.

NLM held a webcast on October 6th and 7th, the recording along with answers to questions can be found online.
If you have questions please feel free to contact Lauri Fennell at the NNLM-NER or contact NLM directly by using the Help Desk link at the bottom right of every PubMed page.

Journal Donation and Exchange

You may recall a query I sent to the MAHSLIN list asking for anyone who may be able to pick up entire runs of journals that were donated to my library which I could not use. Here are two helpful programs brought to light by MAHSLIN members:

- Michelle Eberle suggested the National Library of Medicine’s Journal Donation program at , which DOCLINE libraries can participate in. This is a great way that libraries can assist NLM obtain complete collections of the titles they carry. A number of responders recollected a librarian who donated materials to libraries in other countries, but that service is now limited to books.

- The G.H. Arrow Company also offers an Exchange Program. I was able to find a good home for the physician’s journals and obtain titles that were missing in my collection as well.

Thank you for the responses and the helpful information!

Upcoming Classes from the NER

- Health Literacy Webinar - Guest presenter Jean Shipman, Director of the Eccles Health Sciences Library at the University of Utah, will review the Medical Library Association’s Health Information Literacy Research Project. She will share how this project has helped to educate health care providers about the key role medical librarians can play with improving their institution’s health literacy effort.

  Date: December 11, 2009
  Time: 11 AM - 12 PM
  Register via the NN/LM NER website

- Other ongoing offerings include “Savvy Library Services for Senior Health” and “Finding Quality Online Information about Complementaty and Alternative Medicine”. See the NN/LM NER class and exhibits calendar for more information and/or to register.

2nd Annual UMass & New England Librarian e-Science Symposium

Featuring presentations by:

  Sayeed Choudhury, PhD; Johns Hopkins University
  Karla Hahn, PhD; Association of Research Libraries
  Janet McCue; Cornell University
  Neil Rambo; University of Washington
  MacKenzie Smith; Massachusetts Institute of Technology

The symposium will be held at the Hoagland-Pincus Center, UMass Medical School, Shrewsbury, MA. Formal invitation is forthcoming. For more information, contact Elaine Martin, 508-856-2399.
NAHSL Annual Meeting Cooks Up a FEAST

The 2009 meeting of the North Atlantic Health Sciences Libraries, Inc. was held October 25-27 at the Samoset Resort in Rockport, Maine. "What's Cooking? A Taste of the Future" was the meeting theme and the Conference Planning Committee donned their aprons and did an outstanding job of putting together a program filled with inspirational speakers and innovative ideas. The beautiful coast of Maine also surely didn't hurt in energizing participants for all of the challenging, but equally exciting, work that lies ahead in our field.

The Meeting began on Sunday with an offering of five different CE courses. Almost 60 people took advantage of classes on educational design, copyright, strategic planning, usage statistics and more. All of the classes were well received and participants gave high marks for all they learned. Plans are already underway for next year, so stay tuned!

Plenary speakers included Stuart Weibel, Ph.D., Senior Research Scientist, OCLC Programs and Research who gave an interesting talk entitled "Semantic Web Technologies: Changing Bibliographic Futures". Judith A. Blake, Ph.D., a researcher at The Jackson Laboratory, Bar Harbor, ME offered the scientist's point of view for the work being done in biomedical research today. Her talk, "Biomedical Literature in the Clouds: Ontologies, Data, and the Semantic Web", described the efforts of her group in the development of bioinformatics systems essential for functional genomics, genetics and phenotypic research. Finally, Peter Suber, Ph.D., J.D. and of the Berkman Center for Internet and Society at Harvard Law School presented on the topic of "Open access, medical research, and health science libraries". Dr. Suber is perhaps considered a "guru" of the open access movement and his address was most relevant for the world of academic health science libraries today.

Smaller meetings and breakout sessions provided lots of time for networking, sharing ideas, and learning about some effective, practical programs taking place in our libraries.

MAHSLIN member Mark Goldstein (left) was awarded the 2009 NAHSL Achievement Award for all of his service to the organization. Additionally, a new, Lifetime Achievement Award was established and presented, posthumously, to longtime MAHSLIN and NAHSL member, Jay Daly. Jay's daughter, Eowyn Daly, accepted the honor on her father's behalf. It was a touching tribute to such a wonderful contributor to our profession and friend to so many.

An opening reception at the Owls Head Transportation Museum, a wonderful cocktail party with live music and singing, and the annual banquet all served to round out a terrific conference. OH! And one simply cannot go without mentioning... there was ELVIS!

Several forms of electronic communication were introduced at this year's conference to help keep members current including guest bloggers (MAHSLIN's own, Margo Coletti, being one) and the use of Twitter. You can find an archive of the blog reflections and the tweets on the NAHSL Blog.

Best Wishes!

Congratulations to Liz Fitzpayne on her December 2009 retirement from the Boston Medical Library Branch Library at the Massachusetts Medical Society in Waltham. She will be much missed after working nearly 40 years as a Health Sciences Librarian with the last ten at the MMS. Her many friends and colleagues wish her well.

Congratulations to the Liz!

Be the Change!
MAHSLIN Annual Meeting 2010

In our world, almost everything is online - yet most of us are still behind a desk in the library. Maybe it's time to get out of the library and on to the patient care team where decision support is needed most. This year's meeting will take clinical decision support to the next level, presenting attendees an opportunity to learn what our colleagues are up to, try on some new ideas, and experience the possibilities. I'll keep you up on what's happening as the time draws near.

We are anticipating the MAHSLIN annual meeting will take place on Friday, May 7, 2010 at the Massachusetts Medical Society in Waltham.
