Autobiography of Ashurbanipal
This text is an account of Ashurbanipal's life and education as Crown Prince, up to the day of his coronation. He describes how he was able to read and understand even obscure and ancient texts, and hold his own against the most learned of experts. It is likely that most Mesopotamian kings were illiterate.

This video explores the changes in the way we find, store, create, critique, and share information. This video was created as a conversation starter, and works especially well when brainstorming with people about the near future and the skills needed in order to harness, evaluate, and create information effectively.
